

# Open Discussion- APSUO SC, PUC, and APS Managers

---

JANUARY 2023

## Open Discussion

---

- Goal is to have an open, informal conversation/discussion to help build relationship between APSUO SC/PUC and APS Managers
- If you have any questions/comments, please feel free to raise your hand or ask in the chat

# Topics from APSUO

---

## Guest House

- The quality has decreased when it reopened in 2022.
- Lack of food supply. Could refrigerators be available for food?
- Staying at guest house is a plus so you don't have to go off site late hours
- Some users don't drive and need to stay at guest house.
- What is plan for Guest House during shutdown?

## Partnerships

- More communication on the Diamond/APS partnership- what are the modes of access? Are there specific shifts for APS users?
- Can radiological samples be included in the Diamond mail in access?
- What other partnerships are in place and what is the mode of access?
- Do current proposals in APS system (proposal with higher score that would have been allocated time for next cycle), get priority at comparable beamlines during dark time?
- There will be a new proposal system will be in place after Dark Period- is it possible to add a question about previous GUP scores in new system?

## APS/ANL

- Communication between ANL and APS-for new/international confusion on where to go and how to get access once on site
- ANL office hours- opens at 8:30 am, beamtime starts at 8 am
- International users- need a visa, need approval from ANL, but little communication from ANL on status.

## GUP

- Where can we find an overview of the changes to the GUP/GUP submission system?
- Is there a date for when GUPs will be accepted for time after dark time?
